## **DETAILED ACTION**

### ***Claims***

Claims 10-14 are canceled. Claims 15-35 are added.

### ***Election/Restrictions***

Newly submitted claims 24-35 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: They claim inventions drawn to methods wherein liquid crystal is not present between the substrates prior to mating said substrates, and subsequently filling liquid crystal into the space between said substrates, which is contrary to the originally presented invention whereby liquid crystal is dropped onto one of the substrates coated with the sealant and then superposing the other substrate thereon (claim 11).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 24-35 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Base claim 15 contains the recitation "obtaining a liquid crystal cell having a liquid crystal disposed in a space between two substrates stuck (Applicant's struck) together by a sealant ..." which is a separate step from "forming a first opening and a second opening on that least one side face of the liquid crystal cell, wherein the first and second openings communicate with the space having the liquid crystal". This results in a step of somehow making a hole in the side of the seal of a filled liquid crystal cell, which is not found anywhere in the specification.

As to claims 16-23, they are directly or indirectly dependent upon claim 15 rejected above.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
